

# Streetworks

- All Notices and Permits are handled in one place
- Full built in Code of Practice Compliance
- Full auditable timeline of each individual notice to see when it was updated and by who, including updates from depotnet mobile
- Management of Interim Notices and Registrations Due
- Built in reports with user defined layouts
- Jeopardy Reporting
- Notice statuses are updated real time in line with depotnet mobile

- Management of backfill and reinstatement processes to manage R1's
- Validation rules around all Notice types
- Multiple prompts to the user for what action to take
- Recording of planned and actual work events
- Validation on depotnet mobile to prevent operatives from starting notices early or late
